BRUNO MAURICIO NYLAND

has successfully completed the online Specialization

Angular 17

In this specialization, learners were equipped with a comprehensive set of skills to develop, manage, and optimize Angular applications effectively. completing this specialization, learners will have: Proficiency in setting up and configuring an Angular development environment, skills to create, structure, and manage Angular projects with modular components and services, and expertise in data binding, directives, and dependency injection to enhance application interactivity and maintainability. Learners also acquired knowledge of advanced features like dynamic components, SSR, and HTTP client services for robust application development. This specialization ensures that learners can build scalable, maintainable, and high-performance Angular applications, for real-world development.

Viney King

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
