BRUNO MAURICIO NYLAND

has successfully completed the online Specialization

Mastering Angular: Foundations to Enterprise-Ready Apps

Learners in this Specialization built and refined enterprise-ready Angular 21 applications using modern frontend architecture principles. They mastered components, routing, forms, API integration, authentication, reactive state management, performance optimization, testing strategies, and production readiness. As part of the capstone, learners developed a production-grade, feature-rich Angular application demonstrating real-world implementation of scalable architecture, structured state management, secure authentication workflows, and optimized deployment practices.
